

# GRASS FED RAW GOAT CHEESE

DOGh is inspired by an ancient Persian cheese recipe that produces cheese texturally similar to traditional feta. This cheese is made from the same goat's milk that goes into our milk recipes, providing a diverse array of vitamins, minerals, fatty acids, probiotics, and enzymes. Organic herbs and spices are added to target specific health conditions. These cheeses can be paired with our herbs for optimal health results.

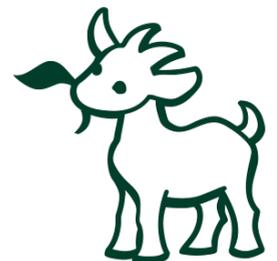

- Happy, grass-fed goats on regenerative pastures
- Full fat raw goat milk soft cheese
- Traditional low-energy cheese-making
- No synthetic or isolate ingredients
- Living Nutrients
- Calorie-dense functional treats

# DOGh for Parasites

Parasites are prevalent in the environment. Pets can get them from other pets, from being outside, or from eating things they shouldn't. Everyone's tolerance for parasites in their body is different. While some pets can handle a large load without being symptomatic, others may develop skin allergies, digestive problems, or even autoimmune problems. DOGh for Parasites is naturally anti-parasitic due to the exoskeleton damaging properties of diatomaceous earth and to the microbiome supporting probiotics in raw goat cheese.

# DOGh for Parasites

Diatomaceous Earth

Diatomaceous earth is made from microalgae called diatoms. These tiny creatures have abrasive outer shells that can damage the exoskeletons of parasites, causing the parasites to dehydrate and die. Diatoms do not damage soft tissue, making diatomaceous earth an excellent chemical free anti-parasitic substance.

Zucchini

Ample anecdotal evidence suggests that consuming zucchini can alter the flavor of feces, making it unpalatable to dogs dealing with coprophagia (poop eating).

# DOGh — Feeding Tips

## 1. Thaw At Room Temperature

You can thaw DOGh at room temperature so that it is ready to use faster. This does not pose a health risk due to the strong probiotic culture of raw cheese. Refridgerate after thawing.

## 2. Modify Dietary Calories While Feeding

DOGh is a very calorie-dense food, which each block being 960 calories, or 120 calories per oz. In order to keep track for easy calorie modification, cut each block into 8 equal pieces. If you feed one piece per day, you can easily adjust other sources of calories to account for it.

## 3. Expect Variance In Presentation

The color, taste, texture, and smell of our foods are highly variable. We are using raw, unpasteurized, non-homogenized fermented foods. Unlike other food companies, our commitment to the nutritional integrity of our ingredients is greater than our commitment to the presentation of them. Real food changes seasonally and even batch to batch, and this rotation is an important aspect of continued health.
