

# Disclaimer

- As with virtually all supplements, statements made have not been approved by the FDA.
- These products are not intended to cure, treat, diagnose or otherwise benefit your pet - per regulation, only pharmaceutical products are permitted to make that claim.
- Results may vary according to the animal's diet and lifestyle.
- These products are not to be used in lieu of, but as a support to, proper veterinary care.
- The amount of time a product must be used before seeing results is heavily dependent on your pet's existing diet and current condition. Generally speaking, minimal results begin to occur between 1 dose and 3 weeks. Maximum results are often not achieved for about 3 months.
- In severe conditions, or conditions where the pet is dependent solely on the effects of the supplement because the diet has not been improved to eliminate processed foods, this time may increase greatly.
- The cleansing response, aka healing crisis, is a process in which your pet's body begins releasing the toxins that have built up in their system over the years. The speed and severity of the cleansing response will vary by individual pet according to their age, diagnosis, lifestyle, severity of symptoms, etc.
- Symptoms of a cleansing response may include: increased shedding, panting, lethargy, excessive water consumption, slightly loose stools, dermatitis, and self-fasting. These symptoms are temporary and transitory. Not every pet will have a cleansing response.

# Sourcing is Key

Individually Hand-crafted

Fair Trade for Life Certified Ingredients

Non-GMO

Certified Organic

Kosher

Hand-Selected Harvesting

Zero-Waste Certified Business Ingredients

Small Farmer Supportive

No Artificial or Natural Colors or other unnecessary junk

NO Fillers, Ever!

NO Preservatives

NO Binders

No Nuts, No Soy, No Wheat, No Corn... No nothing but medicinal herbs!

# Diatomaceous Earth

From the root word, “Diatom,” diatomaceous earth is a chalk-like powder from a single-celled organism fossilized for thousands of years. It is found in dried-up lake beds, exposed to sedimentary silica deposits, mined, and ground into powder. This product is safe to use internally and externally around kids, dogs, cats, and other animals that don’t have an exoskeleton.

## Dosage:

Give 1/4 tsp per 10lbs of body weight once to twice per day

## Ingredients

Food-Grade Diatomaceous Earth ... and nothing else

## Diatomaceous Earth

Diatomaceous Earth is notoriously good for:

- Killing pests with exoskeletons (just like filing your nail) diatomaceous earth is able to “file” off the exoskeleton of bugs while not damaging soft tissues (like the skin or belly of your pet). This filing action causes bugs to dehydrate and die while leaving humans and animals unharmed. This works on Fleas, Bedbugs, Ticks, Cockroaches, Ants, etc.
- Diatomaceous Earth is an excellent source of Silica –
  - builds skin, teeth, hair and nails.
- On the skin, Diatomaceous Earth acts as an oil binder,
  - purifier and exfoliate.
- Reduces Cholesterol (studies showed a 13.2% decrease in
  - cholesterol over 8 weeks)

## Diatomaceous Earth

Diatomaceous Earth is a powdery substance made from tiny creatures called diatoms. Diatoms are microalgae which are found in waterways and soils around the world.

Diatoms are microscopic and have hard outer shells. These shells are abrasive. Like a nail file, their tiny sharp edges can “grind down” and “scrape” the exoskeleton of parasites. Once the exoskeleton is damaged, the parasite will dehydrate and die. Meanwhile, soft tissues such as the digestive tract or skin will not be damaged by it.

Diatomaceous Earth is a non-chemical way to kill anything with an exoskeleton. Solutions uses Organic, Food Grade DE.
