MILK THISTLE

MILK THISTLE

Milk Thistle, or *Silybum marianum*, is revered as an effective liver protective herb. The seeds of the Milk Thistle plant contain a chemical constituent called Silymarin. Silymarin has been heavily researched and validated to be anti-inflammatory with protective and restorative effects on the liver and kidneys. Milk thistle supports the liver's natural detoxification process

benefits of milk thistle

- Reduce nephrotoxicity (toxins in the kidneys)
- Reduce hepatotoxicity (toxins in the liver)
- Reduce neurotoxicity (toxins in the brain and nervous system)
- Reduce some cancers
- Protect against gallbladder disorders
- Protect the liver against natural toxins
- Reduce inflammation
- Improve immune health

DAILY FEEDING

Up to 20lb	1/4th tsp per day
21-40lbs	1/2 tsp per day
41-80lbs	1 tsp per day
over 81lbs	2 tsp per day

For first time use, gradually increase into your pet's diet. Start with 1/4th the recommended daily amount and increase over the course of 3 days.

Contraindications: None known. This blend can be used in combination with other foods and medications.

The daily feeding amount can be fed split into multiple servings or fed all at once. The amount listed here is a total feeding amount for an entire day, not a feeding suggestion per meal.
